

MSC UK SUSTAINABILITY & NET ZERO COMMITMENT

Our Sustainability Policy and Plan sets out how we will shape our business in a positive and responsible way, to ensure a sustainable future as a guiding principle of how we operate. Effective management of our environment, energy usage, carbon reduction, and responsible sourcing are of key importance to the sustained success of our business.

We are committed to achieving net zero carbon emissions by 2050, and our new carbon reduction plan will contribute towards achieving this goal.

Our sustainability policy and plan sets out how we will achieve this and will show how our work directly delivers social and environmental benefits, as well as how we challenge ourselves to undertake our operations as sustainably as we can.

Dave Darby, Managing Director.
